PROJECTS

Human Activity Recognition from Videos
- The system is built for senior citizens who live alone and need support in health related issues. Here the system provides automatic alert generation in critical situations to the care taker and relative responsible persons.
- It is based on video analysis so the system also maintains privacy of the person because automatic videos are analyzed without intervention of human being.

Stock Market Simulator
- The Software is built to achieve a basic understanding of the stock market. Which mirrors the real stock market. It is user-friendly, quick and easy.
- The software is for social purpose to help people for buying and selling stocks without loss.
